

Luis Imlauer

Technical Solutions & Integrations | Python, SQL, Snowflake, APIs

psimlauer@gmail.com | linkedin.com/in/luis-implauer | limlauer.github.io | Posadas, Argentina | Remote contractor

PROFESSIONAL SUMMARY

Technical integrations professional working across enterprise APIs, data workflows, backend systems, and product operations. Uses Python, SQL, and Snowflake to diagnose complex production issues, automate remediation, support partner implementations, and translate technical feedback into clearer requirements and product improvements. Fluent English and experienced working directly with US partners and customers.

TECHNICAL SKILLS

Integrations: REST APIs, OAuth, API keys, bearer tokens, webhooks, SDKs, Postman, cURL, Swagger/OpenAPI, authentication troubleshooting, field mapping

Data & Backend: Python, SQL, Snowflake, FastAPI, SQLAlchemy, MySQL, ETL/ELT, dashboards, data modeling, CTEs, window functions

Delivery: Jira, Confluence, GitHub, Docker, Linux, Redis, GitHub Actions, technical documentation, partner onboarding, requirements analysis

PROFESSIONAL EXPERIENCE

DOOR (ex Latch) - Product Ops Specialist, Integrations

Remote | Apr 2025 - Present

- Define and maintain API/SDK requirements and technical documentation; inspect endpoints, payloads, authentication, webhooks, and mappings to support implementation and certification.
- Resolved approximately 700 duplicate accounts affecting 350 users in one hour by querying Snowflake, defining activity-based validation rules, and automating remediation through internal APIs.
- Built a Python and API-based unit-to-door mapping workflow used across 300+ properties, replacing a manual process that required 15-30 minutes per property.
- Create reusable Snowflake reports and dashboards to monitor property integration status, operational metrics, data quality, and recurring issue patterns.
- Maintain ongoing ownership across multiple integration partners, diagnosing technical issues and coordinating resolution with Product and Engineering.

DOOR (ex Latch) - Integrations Specialist | Data Entry Specialist

Remote | Feb 2024 - Apr 2025 | Oct 2023 - Feb 2024

- Onboarded 200+ properties and collaborated with 10+ external partners through integration, testing, and implementation workflows.
- Mapped units and keys for 250+ properties, built mobile-app usage dashboards, and presented recurring customer feedback themes to product and development leadership.

SELECTED PRODUCT PROJECT

MenuPropio - Founder / Backend Developer

Python, FastAPI, MySQL, Redis, Docker, Firebase | 2025 - Present

- Designing and building a multi-tenant B2B SaaS for restaurant ordering operations, including tenant isolation, granular RBAC, audit logs, rate limiting, authentication, and API-driven workflows.

ADDITIONAL EXPERIENCE & EDUCATION

Polygon3D - Data Analyst / Owner | Built a Python/SQL system for finance, inventory, orders, and operational reporting (2019-2022).

Lacademia - Statistics Professor | Taught Statistics I and II to 100+ students (2022-2023).

Systems Engineering coursework, UTN Rosario | Business Administration coursework, Universidad Nacional de Misiones | Google Data Analytics Certificate

Languages: Spanish (Native), English (Fluent), Portuguese (Proficient), Italian (Basic)
